6.5	Debug and Query Models	19
6.6	Intelligence Models	20
6.6.1	Conation Component Modelling	20
6.6.2	Computation Component Modelling	20
6.6.3	Affectation Component Modelling	20

1 Abstract

Wish to construct an environment as to provide a sufficient "real world" challenge for AV related applications.

1.1 Questions

1.1.1 System Design / Architecture

1.1.2 Metrics

1.1.3 Performance Bounds

2 Motivation

3 Introduction

3.1 Unreal 4

3.2 Blender

3.3 Unity

4 The System

5 System Components

5.1 The Core System

- 5.1.1 The Core Plugin**
- 5.1.2 The Mathematics Plugin**
- 5.1.3 The Utility Plugin**
- 5.1.4 The Analysis Plugin**
- 5.1.5 The Noise Plugin**
- 5.1.6 The YML Plugin**
- 5.1.7 The SlateWrap Plugin**
- 5.1.8 The IPC Plugin**

5.2 The AI System

5.2.1 The AI Plugin

5.2.2 The ML Plugin

5.2.3 The Stochastics Plugin

5.3 The Creator System

- 5.3.1 The Building Creator Plugin**
- 5.3.2 The City Creator Plugin**
- 5.3.3 The Pedestrian Creator Plugin**
- 5.3.4 The Level Creator Plugin**
- 5.3.5 The Terrain Creator Plugin**
- 5.3.6 The Traffic Creator Plugin**
- 5.3.7 The Transit Creator Plugin**
- 5.3.8 The Vehicle Creator Plugin**
- 5.3.9 The Weather Creator Plugin**

5.4 The Applications System

- 5.4.1 The OMNET++ Plugin**
- 5.4.2 The SUMO Plugin**
- 5.4.3 The OSM Plugin**
- 5.4.4 The SnP Plugin**
- 5.4.5 The DLT Plugin**
- 5.4.6 The MotionSynth Plugin**

5.5 The Externality System

5.6 Base Content Packs

5.7 Vehicles Pack

5.8 Pedestrians Pack

5.9 Weather Pack

5.10 External Applications modules

6 System Models

6.1 System Models

6.2 Base Models

6.3 Dynamics Models

6.4 Sensory Models

6.5 Debug and Query Models

6.6 Intelligence Models

- 6.6.1 Conation Component Modelling**
- 6.6.2 Computation Component Modelling**
- 6.6.3 Affectation Component Modelling**
